

Dementia Advisory Service

A specialised support service funded through the Commonwealth Home Support Programme (CHSP).

As an independent Christian charity,
HammondCare champions life.

The Dementia Advisory Service is a specialised support service funded through the Commonwealth Home Support Programme (CHSP).

This new service:

- promotes awareness of dementia
- supports you to seek advice about memory loss and other possible dementia symptoms
- helps you understand what to do if you receive a diagnosis of dementia
- links you to services and other community supports
- provides access to care information, workshops, education and training about dementia.

It is not uncommon to wonder if some symptoms you are experiencing might relate to dementia and the Dementia Advisory Service can help you find out more.

We also know that many people find it quite difficult when they receive a dementia diagnosis – now through this new service we have additional resources to walk alongside you and your family to provide the support you need.
