As an independent Christian charity,
HammondCare champions life.

About us

Nestled in the beautiful leafy surrounds of Sydney's Lower North Shore, Greenwich Hospital offers a comprehensive, personalised and innovative rehabilitation service for people recovering from neurological, cancer and musculoskeletal conditions.

Our rehabilitation services are individually designed to assist each patient to adjust and rebuild their life to live as independently as possible.

We specifically cater for individuals who have experienced life altering events such as:

- Neurological diagnosis (e.g. stroke) with functional problems
- Cancer diagnosis and cancer treatment
- Significant impairment after any medical and surgical illness
- Mobility and functional problems after falls, fractures and any musculoskeletal impairment

Greenwich inpatient rehabilitation services are available for patients covered by the DVA, private health fund insurance, workers compensation or CTP insurance. Coordinated multidisciplinary outpatient services are available to all public and private patients within the LHD. We offer both clinic and home-based rehabilitation services. Depending on the patient's insurance policy, there may be no out-of-pocket expenses.

Coordinated multidisciplinary outpatient services are available to all public and private patients within the LHD. We offer both clinic and home based rehabilitation programs.

We offer specialised rehabilitation services

- ✓ Multidisciplinary inpatient and ambulatory rehabilitation services
- ✓ Neurological rehabilitation programs
- ✓ Cancer rehabilitation programs and lymphoedema intervention
- ✓ Orthopaedic and musculoskeletal rehabilitation programs
- ✓ Hydrotherapy programs
- ✓ Home-based rehabilitation
- ✓ Falls prevention programs

Our facilities

We have two inpatient rehabilitation teams - the Banksia service provides for rehabilitation of people with frailty and musculoskeletal and neurological conditions, whilst the Jacaranda service provides for rehabilitation of cancer survivors.

Our inpatient rehabilitation services offer single rooms, double rooms, and an independent living unit. Rooms may be equipped with either an ensuite bathroom or shared bathroom.

Tailored programs are provided in Greenwich Hospital's recently updated therapy areas, which include a large gymnasium with modern equipment, individual therapy rooms and a hydrotherapy pool. These facilities can be accessed by our inpatients and those attending ambulatory rehabilitation programs.

Our comprehensive care

All patients undertaking a rehabilitation program can undergo a comprehensive multidisciplinary assessment, which leads to a individually tailored rehabilitation program.

Patients, their families and carers have access to a full complement of health professionals to realise their treatment goals.

Please note that the Pharmacy cannot provide a retail service

The Greenwich difference

- ✓ Services are delivered by a comprehensive team of rehabilitation medicine specialists, including physicians, nursing staff, and allied health professionals
- ✓ Experience and capability to provide services for patients with more complex situations and needs
- ✓ Comprehensive maintenance programs to ensure patient wellbeing post-discharge
- ✓ All services draw upon the most recent scientific evidence base
- ✓ Services located in a natural and peaceful environment
- ✓ Free onsite parking
