Greenwich Hospital Update - August 2026

HammondCare

Dear neighbours

We're writing to share an update on local works related to the Greenwich Hospital redevelopment.

Construction of the Greenwich Hospital Redevelopment continues to progress, with significant work underway across the site.

A major milestone has recently been achieved, with demolition of the former hospital buildings now complete. The project has moved into the next phase of construction, with excavation, piling and foundation works underway as the site is prepared for future development.

The project remains on track and we thank our neighbours and the wider community for their continued patience and support as this important work progresses.

Demolition of all buildings now complete

Frequently asked questions

What are the construction hours?

Approved construction hours are:

Monday to Friday: 7.30am to 5.30pm
Saturday: 8.00am to 1.00pm

Any work outside these hours requires approval from the relevant authorities and neighbours will be notified in advance.

How are noise and vibration being managed?

We understand that construction activity can create noise from time to time.

Noise monitoring is undertaken regularly and mitigation measures are implemented where required to minimise impacts on neighbouring properties. We will continue to monitor construction activities and investigate any concerns raised by the community.

How is dust being managed?

Dust management is a key focus during excavation, piling and earthworks activities.

A range of measures are in place across the site, including water suppression systems, regular site inspections and environmental monitoring. Dust monitoring equipment is used to help ensure dust levels remain within approved limits and additional controls are put in place when required.

Will construction affect local parking?

Construction workers are required to use designated parking arrangements and are advised during site induction not to park in surrounding residential streets.

We continue to monitor parking behaviour and minimise impacts on local residents.

Start of construction recognised

In June, HammondCare marked an important milestone in the Greenwich Hospital Redevelopment with a ceremonial sod turn to celebrate the start of major construction works.

The event brought together representatives from HammondCare, Hindmarsh and TSA Riley to recognise the next phase of the redevelopment and the future vision for the Greenwich campus.

HammondCare CEO Andrew Thorburn and Hindmarsh CEO Rowan Hindmarsh
