

Greenwich Hospital Update - May 2026

Dear neighbours

We're writing to share an update on local works related to the Greenwich Hospital redevelopment.

As you would have noticed, construction activity is now underway as part of the transformation of the site into a world-class integrated health campus.

This work brings the project closer to delivering a new centre of excellence for the complex care of older people, which will support the needs of the community into the future.

What's happening on site

Demolition of the former hospital buildings is continuing as part of initial works on site.

Over the coming months, work will move below ground, with excavation and in-ground works expected to begin from mid-June, subject to conditions. Site investigations are also ongoing to inform the next stages of construction.

Out-of-hours activities will be limited during this period with approval and notifications as per consent.

All works are being carried out in accordance with the approved State Significant Development consent, relevant legislation, and management plans.

Early demolition works begin

Project updates available online

As the redevelopment progresses, we would like to remind the community that the HammondCare Greenwich redevelopment website is the primary source of up-to-date project information.

The website provides an overview of the project, details of what we are building and current timelines for the delivery of the new health campus.

You will also find planning approval documentation, approved and proposed modifications to the State Significant Development Application (SSDA) where publicly available.

Most recently a modification has been lodged, with design refinements to the approved hospital building to improve care delivery, staff amenity and overall functionality. Adjustments to internal layouts, communal and clinical spaces, façade elements and landscaping, as well as minor changes to parking arrangements are proposed with no change to the overall scale of the approved development.

The latest information can be viewed by searching 'Greenwich redevelopment' in your browser. Publicly available planning documents can also be accessed on the NSW Planning Portal – Major Projects by searching for "Greenwich Hospital".

We remain committed to keeping neighbours and the wider community informed as the project progresses.

Stay in touch

If you have any questions or concerns, please contact us via your dedicated email address at askgreenwich@hammond.com.au.
